

Zarya Plus — Online Souk

1. Feature Identity

Name

Online Souk

Core Purpose

The Online Souk is a halal economic ecosystem designed to:

- facilitate beneficial exchange,
- support ethical commerce,
- enable community-driven economic participation,
- and create strong daily engagement.

It functions as:

- a discovery platform,
 - a community commerce ecosystem,
 - and a productivity-driven marketplace layer.
-

2. Product Positioning

The Souk is not intended to become:

- a conventional e-commerce giant,
- or a heavy financial transaction processor.

Instead, it acts as:

- a halal opportunity ecosystem,
 - a discovery-driven economic layer,
 - and a community marketplace.
-

3. Supported Categories

The Souk may support:

- Physical products
- Services
- Freelancers
- Jobs/opportunities
- Rentals
- Donations/giveaways
- Islamic products/books
- Local businesses
- Digital products

The platform is intentionally broad to support:

- economic participation,
 - community opportunities,
 - and ecosystem-driven engagement.
-

4. Core Philosophy

The foundational philosophy is:

The marketplace should continuously create reasons for users to return to the platform.

Therefore the system emphasizes:

- freshness,
- discovery,
- community engagement,
- personalized relevance,
- and dynamic participation.

The marketplace is intended to become:

- vibrant,
 - habit-forming in a productive way,
 - and deeply integrated into the daily digital lives of users.
-

5. Core Problems Being Solved

Problem 1 — Fragmented Muslim Commerce Ecosystems

Muslim businesses, freelancers, service providers, and community opportunities are often disconnected.

Problem 2 — Lack of Ethical Discovery Platforms

Most platforms prioritize:

- aggressive monetization,
- manipulative advertising,
- and low-trust engagement.

Problem 3 — Weak Community Commerce

There are limited environments where:

- trust,
- ethics,
- community participation,
- and halal commerce

are integrated together.

6. Commerce Model

Financial Philosophy

The platform intentionally avoids:

- becoming a direct fiat transaction processor,
- acting as a conventional payment gateway,
- or heavily controlling transactions.

User Interaction Model

Users primarily:

- discover,
- connect,
- communicate,
- and exchange.

The platform functions as:

- a facilitator,
 - a trust layer,
 - and a discovery ecosystem.
-

7. Dinarz Wallet System

Purpose

Dinarz functions initially as:

- an internal wallet-based ecosystem currency.

Usage

Users may:

- transact within the ecosystem,
- exchange value voluntarily,
- and use Dinarz as a mutually accepted exchange medium.

Important Limitation

Dinarz is NOT initially positioned as:

- a speculative trading asset,
- or an investment vehicle.

The focus is:

- utility,
- ecosystem participation,
- and optional exchange.

Asset Philosophy

Dinarz is envisioned as:

- an ethical ecosystem currency,
 - initially backed by physical assets.
-

8. Visibility & Retention Strategy

The Souk drives repeat engagement through:

- new listings,
- personalized discovery,
- community-driven relevance,
- trending activity,
- giveaways/freebies,
- AI-curated suggestions,
- rotating visibility,
- local relevance,
- and continuously refreshed opportunities.

The goal is to make the platform:

- active,
 - dynamic,
 - socially beneficial,
 - and continuously useful.
-

9. Discovery Philosophy

The platform emphasizes:

- beneficial discovery,
- trusted recommendations,
- community participation,
- and productive engagement.

Users should regularly discover:

- opportunities,
 - businesses,
 - useful services,
 - collaborations,
 - and beneficial economic activity.
-

10. Moderation Model

AI-Assisted Screening

AI handles:

- initial listing moderation,
- prohibited category filtering,
- automated screening,
- and harmful content detection.

Community Reporting

Users may:

- report inappropriate listings,
- flag concerns,
- and trigger reviews.

Scholar Escalation

Sensitive categories may escalate to:

- scholarly oversight,
 - ethical review,
 - or moderation intervention.
-

11. Halal Commerce Principles

The marketplace prioritizes:

- ethical conduct,
- community trust,
- beneficial exchange,
- and responsible participation.

The platform may restrict:

- prohibited categories,
- unethical services,
- exploitative offerings,
- harmful products,
- and questionable commercial behaviour.

The objective is to maintain:

- a spiritually aligned economic environment.
-

12. Reputation & Trust

Trust within the marketplace should emerge from:

- positive participation,
- ethical conduct,
- community contribution,
- beneficial engagement,
- and healthy ecosystem behaviour.

The system should encourage:

- long-term trust-building,
 - reliability,
 - and ethical business conduct.
-

13. User Experience Philosophy

The Souk should feel:

- vibrant,
- useful,
- community-oriented,
- trustworthy,
- and continuously active.

Users should regularly encounter:

- beneficial opportunities,
- meaningful exchanges,
- useful recommendations,
- and dynamic community participation.

The environment should encourage:

- productivity,
 - halal economic engagement,
 - and healthy digital participation.
-

14. Ecosystem Role

The Online Souk acts as:

- the economic participation layer of Zarya Plus.

It naturally integrates with:

- Shabaka networking communities,
- EIM financial learning ecosystems,
- business communities,
- events,
- and local community ecosystems.

The Souk is intended to strengthen:

- retention,
 - participation,
 - ecosystem usefulness,
 - and daily user engagement.
-

15. Potential Future Expansion

Potential future additions may include:

- verified vendor ecosystems,
- advanced local discovery,
- business reputation systems,
- halal certification integrations,
- logistics partnerships,
- premium business visibility tools,
- and deeper Dinarz ecosystem integration.
